EXPRESSION OF INTEREST

COVERING OF EXISTING TAGOR OPEN AIR THEATRE

Existing Tagore Open Air Theatre (TOAT) at IIT Kharagpur campus is intended to have a long span tubular space frame structure based roofing covered with PTFE (Poly Tetra Fluro Ethylene) Teflon coated Fiberglass Fabric. The vertical planes (remaining portions between existing walls and roof membrane) will be provided with curtain glazing housed within aluminium frames. There will be some reconstruction, partial remodeling or refinishing of the surfaces of the existing structure during the completion of the project. The executor has to produce Shop Drawings for the specific execution details in addition to the architectural drawings supplied to them for construction and get them approved by the architects time to time.

Interested parties may consider the total roof fabrication including specified finished cover along with the vertical glass curtain walls for this superstructure.

The proposed space envelope will be air conditioned, appropriately illuminated with energy conscious lighting, suitable acoustic treatment and necessary fire fighting arrangements.

Willing bidders can also form a consortium of specialized expert organizations for the aforementioned allied services including the prime roof cover construction with vertical glazed curtain walls.

Specialist Executors/Companies etc. may send their consent latest by **15.02.2012** along with the following :

- 1) Company Profile :
- 2) Details of similar job executed :
- 3) Present jobs in hand (location wise) :
- 4) Certificate from Clients :
